| ✓ Web Scraping (Scrapy Framework) | ✓ Linux / Nginx / Jenkins |

EXPERIENCE AND PROJECTS

Backend Developer

Blog API Project | September, 2023 - 2023

- Developed the RestFul Version and the GraphQL Version
- Write well-designed and efficient code by using the best software development practices
- Included throttling to limit request rate, versioning, authentication and authorisation, filtering and searching of data.
- Wrote tests for the models using the built-in test framework in Django.

Data Engineer

Freelancer | March, 2023 - 2023

- Conducted comprehensive research on housing agents in the UK to gather essential data.
- Employed data cleansing and validation techniques to ensure the integrity and quality of the gathered data.
- Conducted regular quality checks and resolved any data discrepancies or inaccuracies, ensuring a high level of data accuracy and reliability.

Backend Developer

E-Commerce Project | July, 2023

- Implemented robust authentication and authorisation protocols as a critical aspect of the website's security.
- Utilised Celery for email scheduling and RabbitMQ for monitoring.
- Deployed the website on AWS EC2, utilising Nginx, Gunicorn, and Supervisor for seamless performance.
- Integrated Stripe for seamless payment.

EDUCATION

2018 - 2024 | Obafemi Awolowo University

Bachelor of Arts - Foreign Languages (Portuguese & German)

2022 - 2023 | Udemy

Python For Everyone.

AWS Solution Architect Course

Docker & Kubernetes Course
